

# 2018 DODECAHEDRON DESK CALENDAR

## PART 1

### Step 1:

Cut along the outer lines and gently score and fold around each pentagon shape and tab.

### Step 2:

Start with the first half and glue each gray tab to the back side of the adjacent pentagon to form half of the dodecahedron.

### Step 3:

Do the same for the second half but leave a few of the tabs open so you can then glue the 2 halves together!
